SUMMARY

I'm a **frontend developer** with knowledge of UI and UX principles and design having over **5 years 6 months** of relevant experience and currently working in "**TCS**". I am in my 28s and currently live in Bangalore.

Logic meets design, creative development professional experienced in crafting spectacular experiences for user interfaces seeks a position that pushes the envelope on creative design. A seasoned team player in collaboration with scalable back-end functionality, providing added value for the client.

I'm specialized in building Web Sites and anything which is weaved around W3C Standard Markup, while working I explore the depths of possibilities. I'm passionate about creating Web based solutions that is both Usable and Accessible without compromising aesthetics.

EXPERIENCE

IT Analyst, TCS Bangalore, India - May 2016 – Current

Working as a frontend developer for the Vitality Health-Adviser Hub, UK based project specializing in private medical insurance sold to the UK market. Since 2014, the company has been a subsidiary of Discovery Limited. My responsibilities include but not limited to discuss the requirement from client and understand the wireframes flow and develop the rich responsive web pages.

HIGHLIGHTS

- Designed wireframe and visual designs along with the Chief UX Designer.
- Developed functional custom directives, UI components.
- Interacted with client and suggested them in developing more user friendly UI.
- Created bower package for consistency.
- Tested the application on all major browsers, iPad, iPhone & Surface Pro.

Senior Software Engineer, Capgemini Bangalore, India -
Apr 2015 – May 2016

Worked as a Usability Expert for Information Systems Team.
Also I was responsible for marketing and advertisements flyers.
